## Instructions for the AZ Drinking Water GWR Triggered Source Water Monitoring Analysis Reporting Form

#### **Raw Well Water**

Untreated water sample taken at the wellhead. Do not take raw well water samples at the EPDS (entry point to the distribution system).

#### Public Water System (PWS) ID Number

A unique 9-digit code assigned to each PWS by ADEQ. The code begins with AZ04 followed by a 5-digit number beginning with the county code.

#### **Public Water System Name**

The legal name the water system has registered with the Arizona Corporation Commission (ACC). If the system is a municipality or other non-ACC regulated entity, this should reflect the legal structure (e.g. XYZ Water Improvement District). Always notify ADEQ of any change in name or ownership.

#### **Owner / Contact Person**

Name of the owner or owner's representative (contact person) who can be contacted. (Note: ADEQ should be notified of all positive results)

# Well Number 55-xxxxx

Well registration number assigned by ADWR. Begins with 55- followed by 6-digits. Must be included on form.

#### **Microbiological Analysis for GWR Fecal Indicators**

Sample Collection, Date & Time: Date the sample was collected in mm/dd/yy format. Time the sample was collected in hh:mm format, use 24-hour time clock.

Lab Specimen ID: A unique 15 character (maximum) alphanumeric code that identifies a particular sample used to test one contaminant or one category of contaminants.

**Total Cl<sub>2</sub> :** A chlorine residual reading is required for all GWR results regardless of whether chlorination is routine. **3100 Total Coliform :** Use only when method provides TC and E. coli results.

Fecal Indicator, Method & Result: Check which fecal indicator analyte was used (3014, 3002, or 3028), list the EPA approved method citation (see table below), and give result.

Analysis Start, Date & Time: Date and time the laboratory analysis starts.

Analysis Complete, Date & Time: Date and time the laboratory analysis ends.
